

SBL FALL ROUND 14

TOSS-UP

1) Math – *Short Answer* How many people need to be in a room to ensure that there are at least 3 people born in the same month?

ANSWER: 25

BONUS

1) Math – *Short Answer* Alice and Bob each choose a distinct diagonal of a regular heptagon. What is the probability that they choose diagonals of the same length?

ANSWER: 6/13

TOSS-UP

2) Biology – *Short Answer* Ridings has debilitating senioritis and thus whenever he hears the word ‘essay’, he immediately reacts by performing a series of unlearned actions. What is this behavior called?

ANSWER: FIXED ACTION PATTERN

BONUS

2) Biology – *Short Answer* Identify all of the following three amino acids that are aromatic:
1) Tyrosine; 2) Phenylalanine; 3) Alanine.

ANSWER: 1 AND 2

TOSS-UP

3) Energy – *Multiple Choice* Researchers at Argonne National Lab have been using optimization to apply artificial intelligence to quantum computing. Which of the following matrices do they most likely encounter while performing optimization?

- W) Hessian
- X) Jacobian
- Y) Wronskian
- Z) Hermitian

ANSWER: W) HESSIAN

BONUS

3) Energy – *Short Answer* Scientists at Lawrence Berkeley National Lab have been investigating new ways to remove heavy metals from industrial waste products. Most heavy metal removal involves the binding of polydentate ligands in what phenomenon?

ANSWER: CHELATION

~~~~~

### TOSS-UP

4) Chemistry – *Multiple Choice* Sodium hydroxide is reacted with 2-bromopropane at high temperature. Which of the following molecules is likely to be the major product of this reaction?

- W) 2-propanol
- X) 2-propanone
- Y) Propene
- Z) Propanoic acid

ANSWER: Y) PROPENE

### BONUS

4) Chemistry – *Short Answer* What is the major product when dimethyl ether is reacted with excess concentrated hydroiodic acid at high temperature?

ANSWER: METHYL IODIDE

### TOSS-UP

5) Physics – *Short Answer* Torque is defined as the time derivative of what quantity?

ANSWER: ANGULAR MOMENTUM

### BONUS

5) Physics – *Short Answer* One mole of a monatomic ideal gas is held at a pressure of 2 atmospheres and a volume of 1 liter. After an adiabatic expansion, it reaches a volume of 27 liters. In atmospheres, what is the final pressure of the system?

ANSWER: 2/243

### TOSS-UP

6) Earth and Space – *Multiple Choice* Which of the following masses is closest to the lower mass limit of a main sequence star in solar masses?

- W) 0.08
- X) 0.16
- Y) 0.5
- Z) 0.75

ANSWER: W) 0.08

### BONUS

6) Earth and Space – *Multiple Choice* When working in the field, Jay finds a fossil replaced by pyrite. Which of the following best describes the likely environment of fossilization?

- W) Oxygen rich deep marine
- X) Oxygen rich river bed
- Y) Anoxic deep marine
- Z) Anoxic river bed

ANSWER: Y) ANOXIC DEEP MARINE

### TOSS-UP

7) Biology – *Short Answer* Identify all of the following three animals that possess two germ layers: 1) Sea sponge; 2) Sea star; 3) Shark.

ANSWER: NONE

### BONUS

7) Biology – *Short Answer* What term is given to the junction between the infundibulum and the hypothalamus, containing the hypothalamo–hypophyseal portal vessels?

ANSWER: MEDIAN EMINENCE

### TOSS-UP

8) Earth and Space – *Multiple Choice* Which of the following types of precipitation is formed by the contact of supercooled water droplets with ice crystals, eventually accreting to form soft white masses?

- W) Freezing rain
- X) Graupel
- Y) Rain
- Z) Hail

ANSWER: X) GRAUPEL

### BONUS

8) Earth and Space – *Short Answer* Identify all of the following three changes, if considered alone, that will raise the eustatic sea level: 1) Increase in total ocean mass; 2) Increase in mean ocean density; 3) Increase in sedimentation rate.

ANSWER: 1 AND 3

### TOSS-UP

9) Energy – *Short Answer* Scientists at Lawrence Berkeley National Lab have been using methods developed in particle physics to increase the effectiveness of quantum computing. In quantum computing, what term is given to the basic unit of quantum information?

ANSWER: QUBIT

### BONUS

9) Energy – *Short Answer* Researchers at Los Alamos National Lab are investigating the dynamics behind the Nice *[neese]* model, which proposes the outward migration of Saturn and Jupiter from the inner disk of the early solar system. The Nice model provides an explanation for which period of intense cratering occurring roughly four billion years ago?

ANSWER: LATE HEAVY BOMBARDMENT

~~~~~

TOSS-UP

10) Math – *Short Answer* What is the length of the shortest altitude in a right triangle with legs of 5 and 12?

ANSWER: 60/13

BONUS

10) Math – *Short Answer* What is the 2020th smallest positive integer that is not a perfect square?

ANSWER: 2065

TOSS-UP

11) Chemistry – *Short Answer* To one significant figure, what is the pH of a 1 molar solution of a weak acid with a pKa of 4?

ANSWER: 2

BONUS

11) Chemistry – *Short Answer* How many isomers exist for the coordination complex formed between magnesium 2+ and EDTA?

ANSWER: 2

~~~~~

### TOSS-UP

12) Physics – *Multiple Choice* In an RC circuit, which of the following best describes the potential difference across the resistor as the capacitor is charged?

- W) Exponentially approaching zero
- X) Exponentially approaching a nonzero constant
- Y) Quadratically approaching zero
- Z) Quadratically approaching a nonzero constant

ANSWER: W) EXPONENTIALLY APPROACHING ZERO

### BONUS

12) Physics – *Short Answer* What function is defined as the difference between kinetic and potential energies for a system?

ANSWER: LAGRANGIAN

### TOSS-UP

13) Biology – *Short Answer* **Phosphodiesterase** is a signaling enzyme that converts what molecule into cyclic AMP?

ANSWER: ATP

### BONUS

13) Biology – *Short Answer* Identify all of the following three clades in which all members undergo spiral cleavage: 1) Annelida; 2) Ecdysozoans; 3) Tetrapods.

ANSWER: 1 AND 2

### TOSS-UP

14) Earth and Space – *Short Answer* Identify all of the following three statements regarding ogives **[OH-jives]** that are true: 1) They are usually parabolic in shape and point towards the direction of glacier flow; 2) They are present as alternating bands of light and dark ice; 3) Ogives form at the foot of icefalls, areas where ice flow is substantially faster.

ANSWER: ALL

### BONUS

14) Earth and Space – *Multiple Choice* Which of the following best describes the solidus in igneous petrology?

- W) The line in a phase diagram above which a mineral starts to melt
- X) The line in a phase diagram above which a mineral completely melts
- Y) A point in a phase diagram at which a mineral completely melts
- Z) A region in a phase diagram within which the mineral is completely solid

ANSWER: W) THE LINE IN A PHASE DIAGRAM ABOVE WHICH A MINERAL STARTS TO MELT

### TOSS-UP

15) Math – *Short Answer* If  $x$ ,  $y$ , and  $z$  are positive real numbers such that  $x + y + z = 1$ , what is the maximum possible value of  $xyz$ ?

ANSWER:  $1/27$

### BONUS

15) Math – *Short Answer* The digits 1, 2, 3, and 4 can be arranged to form 24 different 4-digit integers. What is the sum of these 24 integers?

ANSWER: 66660

### TOSS-UP

16) Chemistry – *Short Answer* What is the name of the temperature at which antiferromagnetic materials lose their microscopic order and become paramagnetic?

ANSWER: NEEL TEMPERATURE (DO NOT ACCEPT: CURIE TEMPERATURE)

### BONUS

16) Chemistry – *Short Answer* Gilman reagents are commonly reacted with acid chlorides to form what functional group?

ANSWER: KETONE

### TOSS-UP

17) Physics – *Short Answer* Ampere's law states that the curl of the magnetic field is equal to the current density times what constant?

ANSWER: VACUUM PERMEABILITY (ACCEPT: PERMEABILITY OF FREE SPACE)

### BONUS

17) Physics – *Short Answer* Identify all of the following three quantities that are required to experimentally calculate Earth's gravitational acceleration using a uniform physical pendulum:  
1) Length of pendulum; 2) Mass of pendulum; 3) Period of oscillation.

ANSWER: 1 AND 3

### TOSS-UP

18) Math – *Short Answer* Identify all of the following **vectors** that are perpendicular to a curve in 3D space: 1) Tangent vector; 2) Normal vector; 3) Binormal vector.

ANSWER: 2 AND 3

### BONUS

18) Math – *Short Answer* If  $x$ ,  $y$ , and  $z$  are positive integers with  $xy = 2021$ , what is the smallest possible value of  $yz$  such that  $y$  is not uniquely determined?

ANSWER: 43

### TOSS-UP

19) Energy – *Short Answer* Researchers at Argonne National Lab are investigating new ways to convert nitrate into ammonia. This is particularly difficult because it requires the transfer of how many electrons per molecule?

ANSWER: 8

### BONUS

19) Energy – *Short Answer* Scientists at Idaho National Lab have been developing new methods for the production of X-rays for applications in medicine. Currently, many X-rays are produced by the deceleration of electrons as they approach atomic nuclei, producing what specific type of radiation?

ANSWER: BREHMSSTRAHLUNG (ACCEPT: BRAKING RADIATION)

~~~~~

TOSS-UP

20) Biology – *Short Answer* What general term is used to describe the asexual reproduction of plants occurring without fertilization?

ANSWER: APOMIXIS

BONUS

20) Biology – *Short Answer* Identify all of the following **that** are true regarding the enzyme transducin: 1) It is found in the retina; 2) It directly regulates the production of cyclic AMP; 3) It is key to the metabolism of tyrosine.

ANSWER: 1 ONLY

TOSS-UP

21) Earth and Space – *Short Answer* The inverse of the Hubble constant is approximately equal to what cosmological quantity?

ANSWER: AGE OF THE UNIVERSE

BONUS

21) Earth and Space – *Short Answer* Identify all of the following three mechanisms that are thought to have generated Earth's internal heat: 1) Decay of radioactive isotopes; 2) Friction from planetary differentiation; 3) Moon-forming impact with Theia.

ANSWER: ALL

TOSS-UP

22) Physics – *Short Answer* Identify all of the following three particles that have zero spin: 1) Photon; 2) Higgs boson; 3) Muon.

ANSWER: 2 ONLY

BONUS

22) Physics – *Short Answer* An apparatus consists of two identical bulbs separated by a stopcock. Initially, the stopcock is closed, and 3 gas molecules are added to each bulb. Alice opens the stopcock and leaves the system for some time. How many times as likely are the molecules to be evenly split between the bulbs than they are to all be in the left bulb?

ANSWER: 20

TOSS-UP

23) Chemistry – *Short Answer* Which allotrope of phosphorus has a standard enthalpy of formation of zero?

ANSWER: WHITE PHOSPHORUS

BONUS

23) Chemistry – *Short Answer* What quantity is defined as the effective partial pressure for a real gas?

ANSWER: FUGACITY
