6) CHEMISTRY *Multiple Choice* In the Fischer esterification, which of the following will not affect the position of the equilibrium?

W) Adding more mineral acid in catalytic amounts

X) Adding more alcohol

Y) Adding more carboxylic acid

Z) Decreasing the temperature

ANSWER: W) Adding more mineral acid in catalytic amounts

### BONUS

6) CHEMISTRY *Multiple Choice* Which of the following explains why lanthanide contraction occurs?

W) Valence s orbitals have high penetration into nuclear regions

X) Inner core f electrons provide especially poor shielding from the nuclear charge

Y) Valence s electrons have a higher probability closer to the nucleus

Z) Inner core f electrons have a higher probability closer to the nucleus

ANSWER: X) Core f electrons have especially poor shielding from the nuclear charge
