

NORTH HOLLYWOOD SCRIM ROUND 1/19/2020

1. BIOLOGY *Multiple Choice*. Which of the following cranial nerves is not associated with eye movement?

- W) Trochlear
- X) Oculomotor
- Y) Trigeminal
- Z) Abducens

Answer: Y) Trigeminal

1. BIOLOGY *Short Answer*. Give the following 4 components of a typical eudicot root from innermost to outermost:

- 1) Pericycle
- 2) Endodermis
- 3) Xylem
- 4) Cortex

Answer: 3, 1, 2, 4

2. EARTH AND SPACE *Short Answer*. The Babcock model is used to describe what phenomenon occurring on the Sun's surface?

Answer: Sunspots (accept magnetic cycle)

2. EARTH AND SPACE *Short Answer*. Name all of the following 3 that are known causes of gamma-ray bursts:

- 1) Magnetars
- 2) Neutron star mergers
- 3) Hypernovae

Answer: All of them

3. PHYSICS *Multiple Choice*. A system has a positive entropy change, and yet is reversible. Which of the following is true?

- W) The process must be adiabatic
- X) The process must have a positive heat flow
- Y) The process must have a negative heat flow
- Z) This is not possible

Answer: X) The process must have a positive heat flow

3. PHYSICS *Short Answer*. Speaker A emits sound waves in all directions. I surround speaker A with a huge muffler shaped like a hollowed out sphere, with inner radius 0.5 m and outer radius 1 m. The muffler is made so that the total energy of all points a distance d from the speaker is

inversely proportional to the square of d. The ratio of the pressure amplitude of the sound wave at the inner radius of the muffler to the outer radius is what?

Answer: $\frac{1}{4}$

4. MATH *Short Answer*. Evaluate the following indefinite integral: $\int 3x(e^{x^2})dx$.

Answer: $3(e^{x^2})/2 + c$

4. MATH *Short Answer*. A 4×2 grid is filled such that the numbers in each row increase from left to right, and the numbers in each column increase from top to bottom. How many different grids are possible?

Answer: 14

5. CHEMISTRY *Short Answer*. Which of the following 4 statements are false concerning thermodynamics?

- 1) The most work a gas can do is under isobaric conditions
- 2) No work can be done if the change in enthalpy is equal to the heat supplied
- 3) The external pressure of the expansion of the gas decreases if the process is reversible
- 4) Entropy is not a state function

Answer: 1, 2, 4

5. CHEMISTRY *Short Answer*. What is the work done if 1/8.314 moles of gas expands reversibly from 1 to 2 liters at 27 degrees Celsius? Assume $\ln 2 = 0.69$.

Answer: 207 J

6. BIOLOGY *Short Answer*. All animals except sponges are classified under a clade called what?

Answer: Eumetazoa

6. BIOLOGY *Multiple Choice*. 90% of water reabsorption in the kidney occurs in which of the following tubular segments?

- W) Proximal convoluted tubule
- X) Descending loop of henle
- Y) Ascending loop of henle
- Z) Distal convoluted tubule

Answer: W) Proximal convoluted tubule

7. EARTH AND SPACE *Short Answer*. When the environmental lapse rate is always less than the wet adiabatic lapse rate, a parcel of air is said to be in what state?

Answer: Absolute stability

7. EARTH AND SPACE *Short Answer.* Name these Precambrian seafloor formations, associated with the events of the Great Oxygenation Period around 2.5 billion years ago.

Answer: Banded iron formations

8. PHYSICS *Multiple Choice* A capacitor and resistor are connected in parallel to an open switch and 12 V battery. Which of the following describes what will happen when the switch is closed initially:

- W) All of the current will flow through the capacitor.
- X) All of the current will flow through the resistor.
- Y) Current will flow through both the capacitor and the resistor.
- Z) There will be no current flow.

Answer: W) All of the current will flow through the capacitor.

8. PHYSICS *Short Answer* Three 2 ohm resistors are placed in series and connected in parallel to a 4 ohm resistor. What is the equivalent resistance of this circuit?

Answer: 12/5

9. MATH *Short Answer.* Which of the following three quantities are not equal between icosahedrons and dodecahedrons?

- 1) Number of faces
- 2) Number of edges
- 3) Number of vertices

Answer: 1, 3

9. MATH *Multiple Choice.* Truncated dodecahedrons are made by shaving tetrahedrons off the vertices of a regular dodecahedron. How many faces, vertices, and edges does this solid have, respectively?

Answer: 32 faces, 60 vertices, 90 edges

10. CHEMISTRY *Short Answer.* Arrange the following 4 ligands in decreasing ligand strength.

- 1) OH⁻
- 2) H₂O
- 3) NH₃
- 4) F⁻

Answer: 3, 2, 1, 4

10. CHEMISTRY *Multiple Choice*. Which of the following best explains why H₂O is a stronger field ligand than OH⁻?

- W) A pi orbital bonds to a t_{2g} orbital and OH⁻ contributes more towards the new molecular orbitals
- X) A pi orbital bonds to a t_{2g} orbital and H₂O contributed more towards the new molecular bonding orbitals
- Y) There are steric repulsions between the hydrogens on neighboring ligands
- Z) H₂O relinquishes protons to create a stronger metal-ligand bond

Answer: W) A pi orbital bonds to a t_{2g} orbital and OH⁻ contributes more towards the new molecular orbitals

11. BIOLOGY *Multiple Choice*. The structure of collagen can be best described as a

- W) Alpha helix
- X) Coiled coil
- Y) Double helix
- Z) Triple helix

Answer: Z) Triple helix

11. BIOLOGY *Short Answer*. A membrane has a 2 M solution of sodium on side A and a 0.1 M solution on side B. If the membrane is permeable to sodium ions but not to chloride ions, what is the voltage of side A with respect to side B, to the nearest 10 mV?

Answer: -80 mV

12. EARTH AND SPACE *Multiple Choice*. Which of the following is not a polymorph of potassium feldspar?

- W) Sanidine
- X) Microcline
- Y) Orthoclase
- Z) Anorthite

Answer: Z) Anorthite

12. EARTH AND SPACE *Short Answer*. If the underlying bedrock is relatively flat and uniform, a stream will most likely develop what type of drainage pattern?

Answer: Dendritic

13. PHYSICS *Short Answer*. A 4 kg ball is travelling with a velocity of 6 m/s toward a 2 kg ball that is not in motion. In m/s, what is the velocity of the center of mass of this system?

Answer: 4 m/s

13. PHYSICS *Short Answer*. A spaceship travels at a velocity of $0.5c$ relative to Earth. A ball is shot out of the spaceship with a velocity of $0.5c$ relative to the spaceship. What velocity would the ball have if someone were to observe it from Earth? Express your answer as a multiple of c .

Answer: $0.8c$

14. MATH *Short Answer*. With respect to z , what is the partial derivative of $4xyz^3$?

Answer: $12xyz^2$

14. MATH *Short Answer*. A quadrilateral has integer side lengths of 15, 17, 19, and x . What is the sum of all possible values of x ?

Answer: 1275

15. CHEMISTRY *Short Answer*. What is the work done when 0.2 moles of Ar at 273 K in a 3 L container undergoes free expansion?

Answer: 0 J

15. CHEMISTRY *Short Answer*. What is the change in internal energy when a gas expands isothermally from 2 to 4 L under an external pressure of 80 Pascals?

Answer: 0 J

16. BIOLOGY *Multiple Choice*. Vernalization is used to directly accelerate which of the following processes?

- W) Seed germination
- X) Flowering
- Y) Fruit production
- Z) Plant growth

Answer: X) Flowering

16. BIOLOGY *Short Answer*. Name these cholesterol and sphingolipid rich structures that often serve as sites of congregation for membrane proteins.

Answer: Lipid rafts

17. EARTH AND SPACE *Short Answer*. What emission line in the radio wavelength is used to observe clouds of interstellar gas of neutral hydrogen?

Answer: 21 cm

17. EARTH AND SPACE *Multiple Choice*. Which of the following is the correct explanation for the 21 cm-line emission?

W) The spin orientation of the electron within the hydrogen atom have slightly different energy states, and the shift in the spin orientation gives rise to a photon with wavelength 21 cm.

X) The electron of a hydrogen atom drops from the 2nd to the first energy state, emitting a photon of wavelength 21 cm.

Y) Deuterium spontaneously undergoes beta decay, producing an electron neutrino coupled with a photon of wavelength 21 cm.

Z) The collision of two hydrogen atoms causes a small shock wave, which corresponds a gravitational wave of wavelength 21 cm.

Answer: W) The spin orientation of the electron within the hydrogen atom have slightly different energy states, and the shift in the spin orientation gives rise to a photon with wavelength 21 cm.

18. PHYSICS *Short Answer*. A transformer has a primary winding with 48 turns and a secondary winding with 12 turns and a terminal voltage of 210 V. What is the terminal voltage of the primary winding?

Answer: 840 V

18. PHYSICS *Short Answer*. A 5 kg solid uniform disk is released from rest at the top of a 6 m long ramp with a 30° incline. In joules, what is the rotational kinetic energy of the hoop at the bottom of the ramp?

Answer: 50 J

19. MATH *Multiple Choice* Which of the following numbers has a remainder of 1 when divided by 14?

W) 2^6

X) 3^6

Y) 6^6

Z) 7^6

Answer: X) 3^6

19. MATH *Short Answer*. A pentagon is drawn on a coordinate plane, such that it has the coordinates (0,0), (1, 2), (3, 3), (5, 1), and (6,0). What is the area of this pentagon?

Answer: 21/2

20. CHEMISTRY *Multiple Choice*. What is the result when the half life of a certain first order reaction is expressed in terms of the rate constant k?

W) e^{2k}

X) $e^{k/2}$

Y) $\ln 2/k$

Z) $\ln k/2$

Answer: Y) $\ln 2/k$

20. CHEMISTRY *Short Answer*. If the decomposition of A is first order in A, what is the fraction of the initial concentration remaining after 400 s if the rate constant is $6.9 \times 10^{-3}/\text{s}$? Assume $\ln 2=0.69$.

Answer: 1/16

21. BIOLOGY *Multiple Choice*. A mutant chicken expressing too much Sonic Hedgehog on their limbs will seem to have which of the following changes?

- W) Longer toes
- X) Shorter toes
- Y) Super speed
- Z) Blue-tinted skin

Answer: W) Longer toes

21. BIOLOGY *Short Answer*. Which of the following 3 features are among the reasons why whisk ferns are considered living fossils?

- 1) They lack true leaves
- 2) They lack true roots
- 3) They lack sporangia

Answer: 1, 2

22. EARTH AND SPACE *Multiple Choice*. Which of the following is closest to Hubble's Constant?

- W) 30 km/s Mpc (read kilometers per second per Megaparsec)
- X) 50 km/s Mpc
- Y) 70 km/s Mpc
- Z) 90 km/s Mpc

Answer: Y) 70 km/s Mpc

22. EARTH AND SPACE *Short Answer*. Name all of the following three that can be used to estimate the age of the universe.

- 1) The inverse of the Hubble's constant
- 2) WMAP observations
- 3) Globular clusters

Answer: All of them

23. PHYSICS *Short Answer*. A ball is thrown off a 2 m high ledge at an angle of 37° above the horizontal, with a speed of 5 m/s. Approximating g as 10 m/s, when the ball reaches the ground, what horizontal distance has it traveled?

Answer: 4 m

23. PHYSICS *Short Answer*. A crystal lattice has an interplanar distance of 1 nm. X-rays hit it from angles strictly greater than 0 and less than 90° from the normal. If the X-rays have wavelengths of 0.5 nm, at what 3 angles from the normal will coherent scattering occur?

Answer: $\arccos(1/4)$, 60° , $\arccos(3/4)$

24. MATH *Short Answer*. Find the sin of the arccosine of 1/4.

Answer: $\sqrt{15}/4$

24. MATH *Short Answer*. Find the sum of the reciprocals of the factors of 72.

Answer: 65/24

25. CHEMISTRY *Short Answer*. Arrange the following 4 by increasing pkA.

- 1) Water
- 2) n-butanol
- 3) Diethyl ether
- 4) Hydrogen peroxide

Answer: 4, 1, 2, 3

25. CHEMISTRY *Multiple Choice*. Which of the following is false concerning the Williamson ether synthesis?

- W) The alkoxide attacks the electrophile in a transition state that is pentacoordinate
X) The alcohol is deprotonated to form an alkoxide ion
Y) Increasing the concentration of alcohol and base would increase the rate of reaction
Z) The electrophile in the reaction is a carbocation

Answer: Z) The electrophile in the reaction is a carbocation
